SKILLS

C++, Python, Algorithms, Data Structures, Machine Learning, Linux, Calculus, Time Management, Problem Solving, Consultation, Communication, Teamwork

EDUCATION

University of Washington Bothell

September 2023-Present

Current Major: Computer Science and Software Engineering - GPA: 3.86

Relevant Courses: Calculus | Data Structures, Algorithms, and Discrete Math | Database Systems | Software Design

Freshman and Sophomore Year Dean's List Student. 3.84 GPA

Kamiak High School

September 2019-June 2023

Member of the National Honor Society, Washington Technology Student Association, and Key Club. 3.873 GPA

WORK EXPERIENCE

Student Technology Consultant

October 2024 - Present

University of Washington Bothell

- Consult with students to understand technology-based problems to provide effective solutions
- Manage both physical and digital inventory of technological devices
- Directed individuals to appropriate locations and support resources

Landlord Law Internship

October 2023 - March 2024

Intern

- Managed customer documents to ensure a proper workflow for the firm
- Created client profiles to begin the process of onboarding
- Supported co-workers by utilizing PracticeMaster software to organize client data
- Validated various aspects about clients and properties to verify the provided information

PROJECT EXPERIENCE

Verlet Integration Particle Simulation | [Github Link](#)

August 2025

- Developed a physics-based particle engine using Verlet integration for realistic motion
- Implemented spatial partitioning with a uniform grid to optimize collision detection
- Refined performance by reducing expensive math operations and memory accesses

University Of Washington Bothell Hackathon

April 2025

- Developed a full-stack web app that explains local and national laws in plain language
- Leveraged Gemma NLP to classify user queries and generate summaries of legislative text
- Developed teamwork and adaptability through agile collaboration, mentor feedback, and rapid delivery

Local Server

May 2024 - June 2024

- Created a server utilizing Linux framework to enable remote accessibility
- Enabled local network access to users for data media storage and viewing
- Gained an understanding of how to navigate the command prompt on both Linux and Windows

ACTIVITIES

Mukilteo School District Summer School

July 2022 - August 2022

School Volunteer

- Supervised students during school activities to provide a safe learning environment
- Managed school resources to ensure a productive learning and teaching environment

Washington Technology Student Association

September 2021 - June 2023

Competition Team Member

- Directed and organized work between group members to ensure on-time project completion
- Placed second out of eleven high schools in a state competition for Audio Podcasting
- Recorded meeting minutes and compiled important information to create shared documents and presentations
